

## **Looking for an opportunity to handle professional projects in Digital Design and Web Design.**

I am a highly motivated and experienced designer committed to a creative and functionally professional career. To meet the deadline is part of my routine with a determined learner's openness. Working in an environment of group associations, I always present new ideas.

I have the skills to:

- Determine work priorities, project specifications and audience; handle various file formats, software packages, internet and email, technologies in Digital Design and operating systems (Windows, OS X) to complete assigned tasks by deadline.
- Create and manipulate digital images, electronic illustrations, video files, audio files, and animation for presentations, interactive projects.
- Design and publish web pages with interactivity. Understanding of web page bandwidth.
- Design and publish digital designs and layout projects, typography, tables and styles with color management, pre-press profiles, collect for output and pre-flight, individually and as a team.
- Present and defend design projects, utilize storyboarding, and create a marketing strategy for digital design.
