

Wind Energy

harnessing the power of Nature

We are faced with the historic opportunity to make the switch to a clean energy economy, reduce our nation's dangerous dependence on foreign oil and say goodbye to the dirty energy of our past.

The House recently passed comprehensive climate and clean energy legislation. Now, it's up to the Senate to act.

With record sums being spent by opponents of clean energy to block any bill, we need your help to remind our leaders to do the right thing.

Write your Senators, *Demand Clean Energy.*
